Autrol Field Indicator Overview

Autrol Field Indicator, Model AI-100, is an Indicator for converting and displaying received 4 to 20 mA current input to set range.

The Indicator is available to indicate 5 digit numbers, 6 digit letters and 4 type special symbols on LCD.

It has main functions such as Displaying 4 to 20mA current, Easy Configuration, Changing Square Root function and User Define Units.

AI-100 does not need separated power and it operates loop-powered 4 to 20mA.

The minimum operating current is 3.6 mA and maximum operating voltage is 2 Vdc.

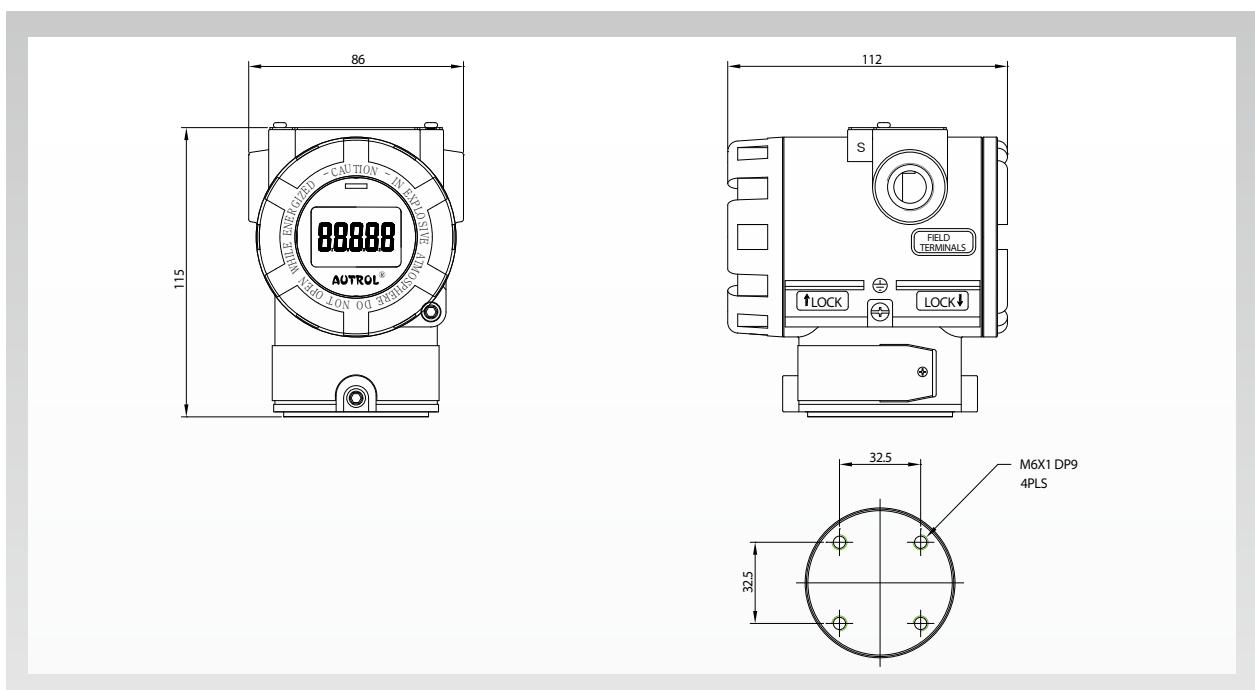

User define function, E-Unit (Engineering Unit), can modify the unit letters that user wants to indicate on LCD as well as basic selectable units.
