

The easiest and most accurate **remote tank level monitoring solution** that can be monitored and controlled via your computer or mobile phone

Accurate tank level measurement is critical for process efficiency and product quality. The dBi with SignalFire Ranger solution from **Pulsar Measurement** enables operators and engineers to confidently operate their processes. The SignalFire Cloud allows for easy and convenient monitoring, reporting, and alarming, whether using a desktop, laptop, tablet, or cellphone.

### The value of using the dBi & SignalFire Ranger solution in tank measurement:

- *The power of Pulsar's DATEM signal processing in an inexpensive two-wire configuration. Confidently measure your process.*
- *SignalFire Ranger includes SIM card and 1-year data plan. Quickly and easily remotely connect to the SignalFire Cloud to monitor, report, and set up alarms.*
- *Configure the SignalFire Cloud to send high or low level alarms to multiple phone numbers or email addresses.*
